

Pierce County records on NDRIN start with documents recorded from January 2000 to present.

Most government lot numbers from July 2008 to present can be searched for by entering the lot number in the lot box along with the section, township and range. Most are indexed against the quarter in which they are located in also.

Outlot numbers may be searched in the same way as government lot numbers.

All Corner Record Indexes can be searched by Township and Range or we used the Township-Range number for the document number such as 151-72 being the document number for Township 151 Range 72. You can also search by using the Township name as the grantor.
